Lahr, 30.06.2005

EvH/bu

To whom it may concern,

this is to certify that **Dr. Wael Hassanein** has visited the cardiology department in Heart Center Lahr/Baden during the period from 01/06/2005 till 30/06/2005.

During his visit Dr. Hassanein has got intensive training in Echocardiography. He attended more than 270 echocardiographic examinations including many postoperative cases. In addition, he attended 39 preoperative and intraoperative transesophageal echocardiographic examinations, as well as many ultrasonic examinations of the pleura and the abdomen and many Doppler examinations of the carotid, radial and femoral arteries.

Our cardiologists were always keen to clearly explain to him all the steps of the different ultrasonic procedures.

By the end of the training period, he performed himself 26 echocardiographies, 8 pleural ultrasonographies, 4 carotid and 3 radial Doppler examinations. He could prove a reliable ability to conduct the examinations and to interpret the findings.

I hope this training period will be beneficial to him and I wish him the best.

Prof. Dr. Eberhard Freiherr von Hodenberg
